Mission statement

We aim to be the benchmark of quality in the shutter industry. Our passion, coupled with our expertise, drives us to always deliver the best results.

About us

With a proud legacy that spans several decades in steel trading, Dura Ultima was built on a bedrock of dedication to ingenuity and customer service.

At Dura Ultima, our team of engineers, fabricators, project managers and installers are driven to diligently cater to your needs and requirements.

Quality people and quality products are what keep Dura Ultima miles ahead in the shutter industry. Contact us today for a full breadth of products that can offer shutter solutions for virtually any application.

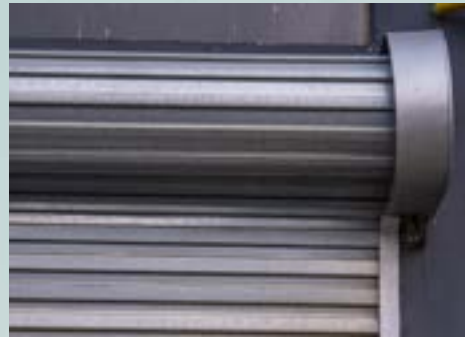

Dura Promise

Providing our customers with a full breadth of products that can offer shutter solutions for virtually any application – that's the Dura promise.

Our team's perseverance and unshaken determination have helped pave the way to newer heights. At Dura, all our employees share the same drive and core fundamental values – attention to detail, honesty, perseverance and responsibility. These pillars are what have propelled us in our journey from conception to completion of all our products.

Dura Ultima's team of engineers, fabricators, project managers and installers are driven to place our clients at the forefront and diligently cater to their needs and requirements. Quality people and quality products are what keep Dura Ultima miles ahead in the shutter industry.

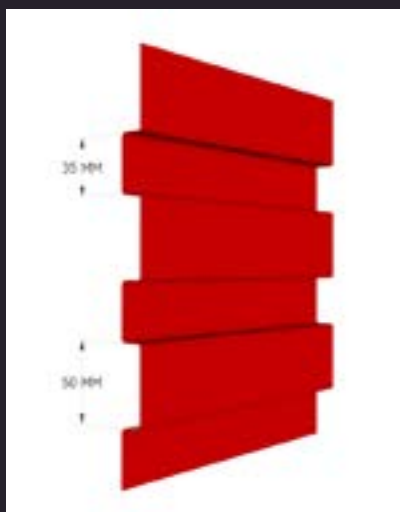

SERIES 1090 DURA ULTIMA The shutter experts Roller Door – Built to last

Dura Ultima's Roller Doors feature a compact design and are manufactured using the latest technology with the highest standards of quality and commitment. Versatile, easy-to-use and long lasting, the Series 1090 Roller Doors are the perfect fit for shops and garages.

FEATURES

- ▶ **Highly durable:** Our superior roller doors are made of high tensile strength steel panels that can withstand huge amounts of force.
- ▶ **Absolutely non-corrosive:** The Aluminium and Zinc-coated steel panels provide complete protection from rust.
- ▶ **Superior aesthetics:** The Series 1090 is available in a wide range of vibrant colours making it a stylish addition to any facility.
- ▶ **Smooth and quiet operation:** Specially designed nylon polyguides provide noiseless and hassle-free operation without the need for lubrication.
- ▶ **Superior weather protection:** Multi-treatment colour-coating process gives our steel panels superior weather protection capabilities.
- ▶ **Easy to maintain:** Say goodbye to regular maintenance with Dura Ultima's easy-to-clean design and virtually no greasing or painting requirements.
- ▶ **Automation:** Series 1090 doors are also available in automatic options with Duramatic Motors designed for all door sizes.

SERIES 2080 DURA ULTIMA

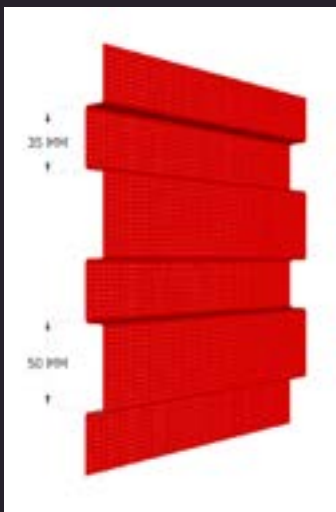

The shutter experts

Visi Screen Roller Door - A Lasting Impression

The visual appeal of your store doesn't have to end at closing hours, introducing Series 2080, our premium Visi Screen Roller Doors that allow visibility while simultaneously protecting your property. Commonly known as perforated shutters, the 1mm perforations allow up to 70% visibility from unlit areas into a lit area. Our Visi Screen Doors are an amalgamation of durability and visibility - the winning combination for high-end stores and shopping malls.

FEATURES

- ▶ **Multiple minute perforations:** With 1mm perforations, the Series 2080 Doors can be completely or partially perforated depending on your requirements. Combine them with our Aluminium or Polycarbonate Doors for an improved aesthetic look.
- ▶ **Highly durable:** Our superior roller doors are made of high tensile strength steel panels that can withstand anything.
- ▶ **Absolutely non-corrosive:** Aluminium and Zinc-coated steel panels provide complete protection from rust.
- ▶ **Superior aesthetics:** The Series 2080 is available in a wide range of vibrant colours making it a stylish addition to any facility.
- ▶ **Smooth and quiet operation:** Specially designed nylon polyguides provide noiseless and hassle-free operation without the need for lubrication.
- ▶ **Superior weather protection:** Multi-treatment colour-coating process gives our steel panels superior weather protection capabilities.
- ▶ **Easy to maintain:** Say goodbye to regular maintenance with Dura Ultima's easy-to-clean design and no greasing or painting requirements.
- ▶ **Automation:** Series 2080 doors are also available in automatic options with Duramatic Motors designed for all door sizes.

SERIES VARIANTS

▶ 2080 E (Economy)

Manufactured using galvanised steel sheets with 120 GSM coating

▶ 2080 D (Deluxe)

Manufactured using pre-painted galvalume sheets with personalised colour options

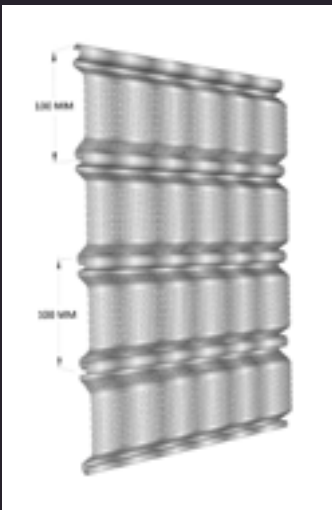

SERIES 3070 DURA ULTIMA The shutter experts

Industrial Doors – Power, security and durability

Dura Ultima's Series 3070 Industrial Doors are designed to meet the tough requirements of any industrial application. Heavy-duty and durable, these doors will benefit factories, warehouses and loading docks with their speed and security. We recommend our clients install the Series 3070 Industrial Doors in doorways larger than 6m in width.

FEATURES

- ▶ **Built for industrial standards:** Designed to be structurally sound even for large openings up to 10m wide.
- ▶ **Anti-corrosive materials:** Highly durable 1.2mm thick S-110 slats made of galvanised steel prevent rusting and corrosion.
- ▶ **Noise-free operation:** Specially designed industrial silenced guides for noiseless functioning at all times.
- ▶ **Wind certified:** Scientifically designed wind-lock clips (designed uniquely for each customer) to help shutters withstand wind speeds of over 140 km/hr.
- ▶ **Fully automated:** With Duramatic Industrial Motor options ranging from 300 kg to 1500 kg (depending on shutter size), these shutters are extremely easy to use.

SERIES VARIANTS

▶ **3070 P (Perforated)**
3mm perforations for
increased transparency

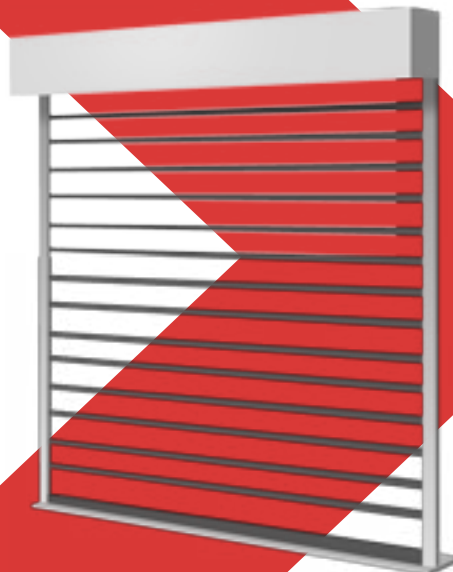

▶ **3070 S (Standard)**
Standard colour shutters

▶ **3070D (Deluxe)**
Customised colour options

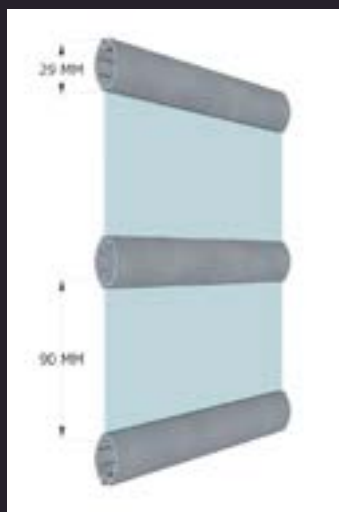

SERIES 4060 DURA ULTIMA PRIME

Polycarbonate Roller Door - Unparalleled Elegance

Our illustrious shutters take on a new avatar with polycarbonate panels to complement your luxurious interiors. Dura Ultima Prime's Series 4060 Polycarbonate Roller Doors are not just stunning to look at, but are among the most energy efficient doors in the market. High-quality polycarbonate slats reinforced with anodised aluminium connecting rods between each panel offer the dual advantage of excellent security and great visibility. Give your storefront an elevated elegance with the Series 4060 Polycarbonate Roller Doors.

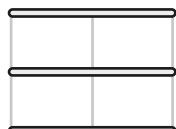

FEATURES

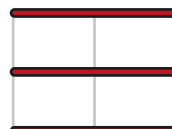

- ▶ **Superior to glass:** The 2mm thick polycarbonate sheets are 250x stronger than glass and 6x lighter, making them the ideal match for your Showroom.
- ▶ **See-through feature:** The transparent trait gives your premises a clean and sophisticated façade and allow your interiors to be on display.
- ▶ **Energy efficient:** Since the Polycarbonate panels are transparent, the transmission of external light translates to lower energy during daytime.
- ▶ **Structurally strong:** The use of anodised aluminium joints between each panel promotes structural integrity.
- ▶ **Noise-free operation:** Nylon polyguide reduces noise and friction, contributing to smooth operation.
- ▶ **Low maintenance:** Our Polycarbonate Roller Doors eliminate the need to paint or lubricate and are easy to maintain.
- ▶ **Fully automated:** Ultima Prime's Series 4060 doors are fully automated using Duramatic Motors designed for all door sizes making them extremely easy to use.

SERIES VARIANTS

- ▶ **4060 S (Standard)**
Transparent polycarbonate slats with standard aluminium joints

- ▶ **4060 D (Deluxe)**
Transparent polycarbonate slats with custom coloured aluminium joints

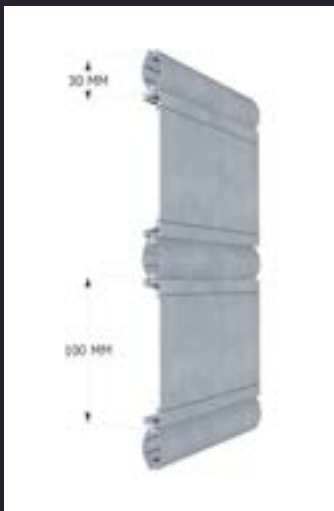

SERIES 5050 DURA ULTIMA PRIME

Aluminium Roller Door - State-of-the-art Sophistication

Strong, simple and sophisticated. With a clean and minimalist design, Ultima Prime's Series 5050 Aluminium Roller Doors offer the best of both worlds - security and style. Manufactured with corrosion-resistant anodised aluminium slats, these doors will not just look architecturally pleasing but will lend character to your property with a touch of elegance. Combine them with our aluminium grill slats or polycarbonate slats for a superior and aesthetic look.

FEATURES

- ▶ **High-end materials:** Ultima Prime's Series 5050 doors are manufactured using 1.2mm anodised aluminium slats. Apart from exceptional strength, they are also much lighter than steel, making them easy to operate.
- ▶ **Excellent security and durability:** Ultima Prime's Aluminium Roller Doors are immune to the ill effects of weather and are steadfast even in the most challenging environments.
- ▶ **Hassle-free maintenance:** Our Aluminium Roller Door are easy to clean and require no painting or lubrication.
- ▶ **Cohesive design:** Custom-painted galvanised guides that seamlessly match the colour of your door.
- ▶ **Smooth operation:** Advanced high-quality springs and nylon polyguides increase operational efficiency.
- ▶ **Fully automated:** Ultima Prime's Series 5050 doors are fully automated using Duramatic Motors designed for all door sizes making them extremely easy to use.

SERIES VARIANTS

SERIES 6040 DURA ULTIMA PRIME

Stainless Steel Grill Door - Exceptional Craftsmanship

Presenting, Ultima Prime's Stainless Steel Grill Doors – a range of roller doors crafted to strike the right balance between safety and aesthetic appeal while giving your property a sense of grandeur. Manufactured from high-grade stainless steel, our Series 6040 premium stainless steel grill doors are the perfect fit for your balconies, showrooms and galleries. Security never looked this sophisticated.

FEATURES

- ▶ **High visibility:** Series 6040 doors provide high visibility and ventilation with their see-through grill design providing the twin benefits of luxury and security.
- ▶ **Best-in-class materials:** Manufactured with only the highest quality SS – 304 grade steel, our Ultima Prime Series 6040 Doors increase the style quotient of your abode.
- ▶ **Strong structural integrity:** The Series 6040 doors are engineered with high grade 19mm stainless steel grills, making them highly resilient to impact, structural change, cracking and/or bending.
- ▶ **Smooth and noiseless operation:** Specially designed nylon polyguides ensure noiseless and hassle-free operation without the need for lubrication.
- ▶ **Fully automated:** Ultima Prime's Series 6040 doors are fully automated using Duramatic motors designed for all door sizes making them extremely easy to use.

SERIES VARIANTS

- ▶ **6040 S (Standard)**
304 grade stainless steel

Duramatic motors

The perfect companion for all our roller doors, Duramatic motors allow you to operate shutters with just the push of a button. They can be installed to fit any shutter size and go through stringent electrical and mechanical tests to guarantee safe and reliable operation.

FEATURES

SAFE:

- ▶ Auto Reversing Feature: During closing operation, the door will stop immediately and reverse when an obstruction is detected by the motor.
- ▶ Motor safety cut-off switch is automatically triggered when the motor detects continuous abnormal or malfunctioning operation

DURABLE

- ▶ All motors go through stringent mechanical and electrical tests before leaving the factory.
- ▶ Counter balance spring is incorporated into the shaft assembly to reduce motor fatigue.
- ▶ Control panels and motors are independent. Both components are therefore not required to be replaced at the same time when either of them has a breakdown.

RELIABLE

- ▶ The motor is designed and built to meet ISO 9002 specification. Concerns for overheating are eliminated by fuse & circuit protection.
- ▶ All Duramatic motors come with One Year Warranty.

ADAPTABLE

- ▶ The motor operations can be controlled using a push button or a remote as desired by the customer.
- ▶ Dual operation mode (motorized or manual): During power failure or in the event of emergency, the door can be operated in manual mode or by using the chain hoist option.
- ▶ Ready to install in any shutter size meeting all requirements of the consumer.

Roller Door Motors (RD Series)

Dura Ultima's roller door motors are built to last and offer smooth and effective operation. Motorised roller doors can increase your facility's efficiency of operation

Industrial Roller Door Motors (IS Series)

A marriage between sophisticated controls and immense power, our industrial door motors are designed to operate heavy-duty doors with ease, allowing a safe and secure environment for your facility.
